Synthetic parameter unit
2 plants, 24 locked units each
Matched meals and noise
2 repeated seeds per unit
Clean feedback reference
freeze requested-command tape
Full detector
manual / supervised recovery
Simple mass residual
manual / supervised recovery
Sham statistical detector
common local and quality stops
Privileged fault-window oracle
evaluator reference
Same cap, local stop and observations
full 48 h; 8 conditions
Matched-clean excess AND deficit
interruption, recovery, glucose
bootstrap parameter units
