Requested amount
r_k (research U / interval)
Authorization + recovery
a_k (research U / interval)
Virtual actuator
emitted mass m_k (g)
latent emission / conversion
simulation only
measurement model
Physiological plant
original family or Hovorka
Evaluator only
excess, deficit, glucose
Reported CGM
observation y_k
causal observation
common local budget
Local balance indication
signed increment (g)
Received mass report
may differ from local indication
Monitoring policy
full / simple / sham
trip / verification
